Carthāgo, inis. f. *A city of Africa, near Tunis, founded by a colony of Phœnicians under Dido, or, as others, under Xorus and Carchedon, from the latter of whom it takes its Greek name* Καρχηδών. *It was a great commercial emporium, connecting the east with western Europe, and became wealthy, and maintained an army of mercenaries, by which it subdued the neighbouring parts of Africa, and invaded Spain, Sardinia, and Sicily, and had colonies and forts in them all. The gold and silver mines in the south of Spain much increased its wealth and power, and we find it, in* B. C. 480. *invading Sicily with a very large army, to subdue the whole island. Being defeated with great loss by Gelo, king of Syracuse, it renewed the attempt in* B. C. 407. *under Annibal, who took Selinus, Agrigentum, and Himera, and again under Imilco, who besieged Syracuse, and was only prevented from taking it by a plague that broke out in his army. During the reign of Dionysius at Syracuse, the Carthaginian interest in Sicily lost ground. But on his death, and the troubles that ensued, they again aspired to the conquest of the island, and besieged Syracuse again, but the siege was raised by Timoleon,* B. C. 343. *In the reign of Agathocles at Syracuse, they supported the malcontents, and besieged him in his capital, but as he had the command of the sea, he left a garrison in Syracuse, and invaded Africa, where he had great successes, and drew many of the dependencies of Carthage into revolt, but was at last overpowered and driven into Sicily; but the disorders at home prevented the Carthaginians from following him.* B. C. 275 *they invaded Sicily again, but were checked by Pyrrhus. Their first war with the Romans began,* B. C. 262. *who, under Duillius, gained the first sea fight against them,* B. C. 258. *and in the following year drove them out of Sardinia and Corsica, and in three years more invaded Africa under Regulus, who after some successes was taken prisoner,* B. C. 253. *The Carthaginian settlements in Sicily were long preserved by the conduct of Hamilcar, the father of Annibal, but on the loss of the great battle of Ægates,* B. C. 239. *they were obliged to surrender them up to the Romans, and the first Punic war ended. It was immediately followed by a most dangerous and sanguinary war in Africa against their own mercenary soldiers. These were subdued by Hamilcar, who then invaded Spain, and conquered all southern and western Spain, and fell in battle against the Vettones, a people in Leon. His son-in-law and successor, Asdrubal, extended the Carthaginian conquests, and founded new Carthage, now Carthagena. His successor, the celebrated Annibal completed the conquest of Spain, took Saguntum, and began the second war with Rome. For his successes in Italy see* Annibal. *His brother Asdrubal commanded in Spain, and cut off the two Roman commanders, Publius and Cneius Scipio, and invaded Italy,* B. C. 205. *but was defeated and killed at the river Metaurus, before he could join his brother, and his officers in Spain were cut off one after another by young Scipio, and the Carthaginians were thus driven out of Spain,* B. C. 204. *as they were from Sardinia by T. Manlius,* B. C. 213. *and from Sicily, by M. Marcellus,* B. C. 210. *The Romans then invaded Africa under young Scipio, surnamed Africanus, and,* B. C. 200. *fought the decisive battle of Zama, which ended the second Punic war, with the loss to Carthage of all its foreign dependencies, and of great part of its African dominions. For the treachery and cruelty with which the Romans attacked them in the third Punic war, see* Appian. Bell. Pun. *this war ended in the destruction of Carthage,* B. C. 144. *Afterwards the city was rebuilt as a Roman colony, and became the capital of the Roman province of Africa, and the court of the Vandal princes when they seized Africa on the decline of the empire. It was retaken and reunited to the empire by Justinian, and finally lost to the Saracens in the reign of Heraclius.*

She, being jealous, went to watch him, and hid herself in a thicket. Cephalus being weary and hot, sat down near her, and called upon Aura to refresh him. Ceres missing her, and not knowing what was become of her, lighted torches on mount Ætna (which, they say, has burnt ever since) and sought for her all the world over; in her travels she came to king Eleusius, and undertook the tuition of his son Triptolemus. Afterwards, hearing that her daughter was carried away by Pluto, she went to Jupiter, and complained to him of the injury done her. Jupiter granted that she should return back, upon condition she had tasted nothing in hell whilst she was there; but it being proved by the witness of Ascalaphus, that she had eaten some of a pomegranate, as she walked in Pluto's orchard, all hope of return vanished; wherefore, in revenge, she turned Ascalaphus into an owl. Cicero, ōnis. m. M. Tullius, *born at Arpinum. His first action in public life was his defence of Sex. Roscius, against a prosecution conducted by one of Sylla's creatures; and the freedom of his remarks was so displeasing to the dictator, that he was obliged to leave Rome, and travel into the provinces of Greece and Asia, where he studied at Rhodes, under Molon. On his return he was made ædile, and in that office he impeached Verres for misgovernment in Sicily. His eloquence raised him to the offices of prætor and consul; in the latter he discovered Catiline's conspiracy, and put to death the leaders of it,* B. C. 61. *Refusing to unite with the first triumvirate, he was banished by their influence through the tribune Clodius, but returned next year,* B. C. 55. *and was made governor of Cilicia. In this government he acquired great popularity, and subdued the free Cilicians, and other hordes, in the mountains that part his province from Syria. On his return to Rome he found the civil war breaking out, and though much courted by Cæsar, he joined the senate and Pompey; yet, after the defeat of Pharsalia, he would not protract the miseries of civil war, but submitted to the conqueror, and was much honoured by him. On the death of Cæsar he was active in restoring the republic and resisting the tyranny of the triumvirs, for which he was included in the list of proscription, and murdered by one Popilius, for whom he had pleaded. He died,* B. C. 41. *His works were very various and numerous; those extant are orations and epistles, two books upon invention in oratory, one upon arrangement, three upon rhetoric at large, one a review of the celebrated orators of Rome, and a few other tracts on oratory; besides a number of philosophical treatises, comprehending every subject under discussion among the ancients. He seeing no way of escape, desired feathers and wax, to make a present, as he pretended, for the king; but therewith he made himself and his son wings, and so flew from Crete to Sardinia, and from thence to Cumæ, where, having lost his son by the way, he built a temple to Apollo. The meaning of the fable is, that Dædalus being privy to the adultery of Pasiphae, the wife of Minos, with his servant named Taurus, was cast into prison with his son Icarus; but they and some other disconiented persons flying from Crete in some small vessels, Minos pursued them so briskly, that the ship in which Icarus was, split against the rocks; but Dædalus having found out the use of sails, got first to Sicily, the king using oars only; and so escaped the fury of his pursuer; whence the proverb,* Remigiis Dædaleis, *to signify a thing done with dexterity and speed.* Vid. *Ov. C. 382. *He had many natural obstacles to success in his profession, as weakness of lungs, and an inarticulate voice, with a difficulty in pronouncing the letter R, which he showed much ingenuity and perseverance in overcoming. He made Thucydides the model of his style, and is said to have transcribed that author eight times with his own hand. A singular account is given of his mode of preparing his orations, by shutting himself in a subterraneous apartment where he studied by lamp-light, day and night, with his beard half shorn off, that he might not be tempted to leave his solitude and come into public; but these circumstances seem not compatible with his political life and intrigues, and the nature of public business at Athens, where extempore replies would often be necessary, as all matters were debated before the assembled people. His first oration was against his guardians who had defrauded him of his patrimony; he then entered public life as an opponent of the Macedonians and their interest at Athens. His most celebrated orations were his Olynthiacs,* B. C. 349. *to encourage his countrymen to relieve Olynthus, when besieged by Philip, and his Philippics, against various measures of the Macedonians and their party at Athens. He united the Thebans and many cities of Greece in a league to resist the encroachments of Philip, which was broken up by the battle of Chæronæa,* B. C. 338. *from which time the Macedonian became the prevailing party at Athens, and Demosthenes was attacked by the orators of that side, especially Æschines, whom he refuted in his celebrated oration On the crown,* B. C. 330. *On the death of Alexander he formed a new league of Grecian states against Macedonia, and besieged Antipater, the European viceroy of Alexander, in Lamia, but on the return of Craterus from Asia to assist Antipater, the siege was raised, and the confederates defeated at Cranon,* B. C. 322. *A Macedonian garrison was put into the port Munychia at Athens, and Demosthenes, who had taken refuge in the temple of Neptune, at Calaurea, was put to death, as also Hyperides, and other orators of the party opposed to Macedonia. See his life in Plutarch, and the parallel between him and Cicero, in Quintilian, book* 10. *where the question of superiority is left undecided.* "*The orations of Cicero are certainly the more read, and the more interesting, for the subjects of them are more important and extensive; but perhaps if Demosthenes had been the pleader against Verres the pleadings might have been more interesting than those of Cicero,*" Auger.

He was banished for treasonable practices by Dionysius the younger, and retired to Peloponnesus, where hearing of the general disaffection of the Syracusans towards the government of that prince, he raised a small force and invaded Sicily. Gathering strength as he marched on, he was at last enabled to blockade Dionysius in the citadel of Syracuse,* B. Whereupon a sally was made by the garrison of Dionysius from the island, and a dreadful slaughter made of the rabble of Syracuse, who in all haste recalled Dion, and the sally was repulsed, and the blockade renewed. An attempt made to relieve the citadel by sea was defeated, and Philistus the historian, who commanded the fleet, fell in the battle. Upon which the citadel surrendered, and the garrison and partizans of Dionysius withdrew to Locri. Dion becoming jealous of Heraclides, who had gained the victory over Philistus, had him assassinated; and by many other arbitrary and impolitic actions lost the attachment as well of his own foreign mercenaries, as of the Syracusan people, and was slain by a conspiracy,* B. He employed the interval in fortifying his capital, and disarming his disaffected subjects, and extending his authority through the cities on the eastern coast of Sicily. He then thought himself strong enough to venture into a new war with Carthage, and beginning it unexpectedly, he took Motya a Carthaginian colony, and massacred the inhabitants*, B. C. 397. *and reduced several other of their settlements before they could raise an army to check him. These were recovered next year by Imilco, the fleet of Dionysius defeated, and Messena and Himera taken; after which the Carthaginians besieged Syracuse, and took one of the quarters of the city, but were prevented from taking the citadel by a pestilence that broke out in their army. Having thus escaped this danger, he besieged and took Rhegium*, B. C. 385. *and soon after received a new defeat from the Carthaginians, in which his brother Leptines was slain. Augustus attempted to reduce it to the form of a province, by his generals Drusus, and Tiberius afterwards emperor, but his measures were broken by the defeat of his general Lollius, and the loss of three legions under Varus,* A. The emperor Aurelius passed the Danube, defeated the Marcomanni in Moravia, and the Quadi in Austria and Hungary, but did not form a province beyond the Danube. The emperor Probus reduced the country between the Rhine, Danube, and Neckar, into a province, but it was not long preserved. The Carthaginians had conquered great part of Bactria before the first Punic war, and drew great supplies of the precious metals from that country; their conquests were extended in the interval of peace with Rome, by Hamilcar Barcas, and his son-in-law Asdrubal, who founded New Carthage, and Hannibal who subdued the midland tribes and those north of the Ebro, and took Saguntum. They were driven out by the Romans under Scipio Africanus. Different Roman commanders subdued different nations and districts, particularly Cato the Censor and Ser. Galba, till their conquests were checked by Veriathus king of Lusitania, who defeated many consuls and prætors, and was at last assassinated by Cæpio when all other means failed. Their next check was at Numantia, where they were repeatedly defeated, and one consul, Mancinus, surrounded and obliged to make piece on hard terms, which the Romans kept no better than that of Furcæ Caudinæ with the Samnites. On his return, his uncle, fearing his talents and popularity, associated him in the succession with his own sons, hoping thus to secure his attachment. But he quarrelled with him, killed one, and drove the other from his dominions to take refuge at Rome, and when commissioners were sent from Rome to restore the expelled prince to half the kingdom of Numidia, he bribed them to favour him in the division, and as soon as they returned to Rome he murdered his cousin, and seized his dominions. He went to Rome to bribe the senate to overlook his conduct, and would have succeeded, but for the interposition of a tribune, C. Memmius, who obtained a decree of war against him. Lăcĕdæmon, is. f. *A city of ancient Greece, in Laconia, on the Eurotas, also called Sparta, a large place in the time of Homer, by whom it is called* ἐυ ναιομενη *and* κητεσσα. *It was the country of Menelaus and Helen, Castor and Pollux, and Hyacinthus, in the fabulous ages. When Peloponnesus was conquered by the Heraclidæ, it fell to the lot of Aristodemus, and from his two sons sprang the two royal families of Sparta. Its laws were made by Lycurgus, said to be on the model of those of Crete.* See them described in Plutarch's life of Lycurgus. *Its government was aristocratical, for the kings had very little authority, except as generals in war, and was administered by a senate of old men, and five annual magistrates called Ephori or Inspectors. The Lacedæmonians became soon formidable to their neighbours, they subdued Messenia after three long and bloody wars, and reduced the inhabitants to slavery, and made many acquisitions at the expense of Arcadia and Argos,* Herod. 1. 82. et 66. *They headed the Greeks in the invasion of Xerxes, and their king Leonidas fell in defence of the pass of Thermopylæ, and Pausanias, who succeeded him, won the great battle of Platæa, in which the invaders were exterminated. His haughtiness disgusted the confederacy, and they refused to co-operate against Persia, except the Athenians took the lead, which was the foundation of the maritime power of that country, and enabled it to maintain war against united Greece twenty-seven years. The Lacedæmonians began the Peloponnesian war to gratify their allies, the Corinthians,* B. C. 431. *in which, at first, they were very unsuccessful, their coasts being ravaged by the Athenians, their fleets driven from the seas, and a large body of their citizens captured at Pylos. But on the failure of the attempt of the Athenians on Syracuse, they obtained a subsidy from the Persian court, with which they built a fleet, and by the talents of Alcibiades, the exiled Athenian, and Lysander, and by enticing the sailors from the Athenians, by offering them higher pay from the Persian treasures, they at last took Athens, and reduced all its dependences, and obtained the command of all Greece. But being defeated by Conon at Cnidus in a sea-fight,* B. C. 394. *and at Leuctra, by Epaminondas,* B. C. 371. *they were reduced to combat for their own existence. Their capital was besieged, and Messenia taken from them, and restored to independence by the Thebans; and they never recovered their power and influence. In Alexander's time, Agis III. one of their kings, was defeated and killed,* B. C. 331. *and they were compelled to submit to the supremacy of Macedonia. With their independence the influence of the laws of Lycurgus was lost, and in an attempt to restore these, Agis IV. lost his life. Sparta was besieged by Pyrrhus,* B. C. 272. *and successfully defended by king Acrotatus, with the assistance of the Alexandrian kings, with whom an alliance was formed from this time. Cleomenes, in a war with the Achæan league, and their ally, Antigonus I. of Macedonia, was defeated at Sellasia, and Sparta was taken by the Macedonians, who established Lycurgus, a usurper, in the kingdom, who was succeeded by Machanidas and Nabis, commonly called tyrants, because usurpers, and not of the royal family. The last of them, Nabis, was put down by the Romans and Ætolians,* B. C. 192. *Sparta became a member of the Achæan league, and, with the rest of the Achæan cities, became part of the Roman province of Achaia,* B. C 144.

Upon which they departed; and presently his mother extinguished the stick, and laid it carefully up. When he was grown up, his father, in the end of harvest sacrificing to the rest of the gods, forgot Diana, who thereupon sent a prodigious boar to destroy his lands; which the young Meleager seeing, got some assistants, hunted the boar, and killed him, and presented his head to Atalanta, the daughter of Jasius king of the Argives, who had first wounded the boar. His uncles by the mother's side were so much incensed herewith, that they offered to take away the head from the princess; which he opposing, slew them in the conflict, and took the lady to wife. [ab οιδεω, tumeo, et πους, pes, quod tumentes haberet pedes, nempe perforatos, quo melius ex arbore penderet, cum pastori a patre occidendus traderetur] *The son of Laius and Jocasta. Laius, king of Thebes, having married Jocasta the daughter of Creon, understood by the oracle, that they should have a son born of that marriage, who should kill him; on which he commanded Jocasta to strangle all the children she should bear: Œdipus being born, his mother gave him to a shepherd to kill him; but he made holes in his feet, and ran an osier twig through them, wherewith he hung him to a tree on mount Cithæron. But it happened that the herdsman of Polybus king of Corinth coming that way, found him and carried him to the queen, who having no children brought him up as her own. When he was grown up, understanding he was not the son of Polybus, he consulted the oracle to know who was his father, and was answered, that he should find him in Phocis, upon which he went thither; and there, as his father was appeasing a tumult, he unwittingly killed him. Thence he went to Thebes, which was then annoyed by the sphinx, a monster who proposed enigmatical questions to all passengers, and if they could not resolve them, she presently devoured them, insomuch that nobody durst come near the city. Hereupon they had recourse to the oracle, who answered, that they could not be freed from the monster unless her riddle was explained. Creon, who had possessed himself of the kingdom after the death of Laius, caused it to be published throughout all Greece, that he would quit his kingdom, and give Jocasta in marriage, to any one that should explain the riddle: Œdipus undertook and effected it, and the monster, transported with rage, threw herself headlong from the rock, and was dashed to pieces. Œdipus, as a reward, had the kingdom given him, and ignorantly married his own mother, by whom he had two sons, Eteocles and Polynices, and two daughters, Antigone and Ismene, who all came to tragical ends. During his reign the kingdom was almost depopulated by a terrible plague, which they were told by the oracle, was not to cease but with the banishment of the murderer of Laius; upon this they had recourse to necromancy for the discovery of him, and Œdipus was found to be the person; who then coming to know that he had been guilty of parricide and incest, pulled out both his eyes, and condemned himself to perpetual banishment.* Fabulam habes apud *Eurip. in Phœnissis, v.* 27. et seq. et apud *Sophocl. in Œdip. Persia, æ. *et* Persis, ĭdis. f. *A country of Asia, bounded on the north by Media, on the south by the gulf of Persia, on the west by Assyria, and on the east by the desert of Gedrosia. It was originally a province of the Assyrian and Babylonian empires, but was taken from them by Cyaxares king of Media, from whose successor, Astyages, it revolted, became independent, and under the great Cyrus subdued first the Lydian empire in Asia Minor, and then the Assyrian by the taking of Babylon, with Bactria and the countries round the Caspian sea. The next king, Cambyses, added Egypt to the empire; his successor, India and Thrace, and the islands of the Ægean sea, and retook Babylon which had revolted: he also invaded Scythia in person, and Greece by his generals, but was repulsed. The invasion of Greece was renewed by his successor Xerxes, and again failed, whereupon the Greeks invaded different provinces of the Persian empire, occupied Ionia and Cyprus, and restored Egypt and Thrace to liberty. A succession of weak princes made repeated attempts to recover these provinces, and did at last retake Ionia and Cyprus at the peace of Antalcidas,* B. C. 387. *One of them, Artaxerxes Mnemon, invading the Carduchi of Armenia, narrowly escaped being captured with his whole army, he also dammed up the estuaries of the Tigris and Euphrates to prevent the Arabs from sailing up and ravaging Assyria. At his death he left all the western provinces of his empire, from the Hellespont to Egypt, in rebellion; these were reduced by his successor Ochus, as also Egypt. In the next reign Persia was invaded by Alexander, who subdued the whole of its dominions, and added to them Scythia and the north-western parts of India. After his death Persia and the rest of the east became provinces of the Seleucidæ of Antioch. About* 246. B. C. *the Parthi, an obscure tribe, near the southern extremity of the Caspian sea, revolted from the empire of Antioch, under Arsaces, and defeated the Macedonian governors of the neighbouring provinces. The Seleucid princes were too much engaged by rebellions and wars with Egypt to send sufficient support to their eastern provinces, which were overrun by the Parthians, till Persia, Media, Bactria, and the rest of the ancient Persian empire, west of the Tigris, were united to Parthia. Some of these provinces were recovered by Antiochus the Great, but upon his death, and the decline of the kingdom of Syria, the Parthians extended their conquests to the Euphrates. They were invaded by Crassus the Roman triumvir,* B. C. 51. *but he was cut off with most of his army. From this time the Parthians made repeated attempts on the Roman provinces of Syria and Asia Minor, but were repulsed by Cassius,* B. C. 50. *Ventidius,* B. C. 36. *and Corbulo,* A. D. 63. *The emperor Trajan invaded Parthia, and conquered several provinces, but these were restored by his successor Adrian. The Persians revolted from Parthia,* A. D. 220. *defeated Artabanus, the last king of Parthia, in several battles, and restored the Persian empire, making Parthia a province of it; but they could never extend it to its ancient limits, Egypt and the Hellespont, though they once took a Roman emperor Valerian prisoner, and surrounded and killed the emperor Julian, and in the reign of Heraclius besieged Constantinople. They were invaded and subdued by the Saracens,* A. D. 647.

But when Jupiter and Juno were born, Ops gave him a stone wrapt up like a child to devour, which he did; and by some such device saved Neptune, and Pluto also. Titan, hearing of this, made war upon his brother, subdued him, and threw him into Tartarus, whence he was delivered by his son Jupiter. C. 103. *He distinguished himself in the Social war, and under Catulus against the Cimbri, so that he was made consul, and appointed to command against Mithridates. His enemies instigated the tribune Sulpitius to propose that this command should be taken from him and given to Marius, whereupon he led his army to Rome, slew Sulpitius, and banished Marius and his party. He then set out on his expedition against Mithridates, defeated his general, Dorylaus, at Orchomenos and at Chæronæa, and obliged Archelaus to shut himself up in Athens, where he besieged him, and took, first the Piræeus, and then the city, which he treated with great severity, sparing the inhabitants nothing but their lives, and declaring that he only did that for the merits of their ancestors. Thence he passed into Asia, and compelled Mithridates to abandon his conquests, and content himself with his original dominions. During his absence the Marian party recovered Rome and Italy; but he returned, defeated the consuls, Norbanus and Scipio, took Rome, shut up young Marius in Præneste, where he took him and his army prisoners*, B. C 80. *and exterminated the Marian faction by proscription, and their allies, the Samnites, by military execution. OF THE

ROMAN COINS, WEIGHTS, AND MEASURES.

THE *Romans* reckoned their money by *æs*, *æses*, *sestertii* or *nummi*, *denarii*, *solidi* or *aurei*, *pondo* or *libra*.

Æs, as it denoted a particular coin, was at first *libralis*, or of a pound weight, and even when it was diminished, retained the name of *libella*. The first impress on this coin was a *Janus*, and on the reverse the *rostrum* of a ship.

As, was divided into twelve parts, the names of whose divisions were these following: *uncia*, *sextans*, *quadrans*, *triens*, *quincunx*, *semis*, *septunx*, *bes*, *dodrans*, *dextans*, *dejunx*.

Quadrans and *Teruncius* are used to signify the smallest brass coin after the reduction of the *as*, as the *sestertius* was the least of the silver coins. The *as* was first reduced to two ounces, then to one ounce, and at last to half an ounce.

The *sestertius* was a silver coin, equal to the fourth part of a *denarius*.

Nummus, when mentioned as a piece of money, was the same with the *sestertius*. So *mille nummi*, *mille sestertii*, and *mille sestertii nummi* signify the same; as do likewise *mille nummûm*, *mille sestertiûm*, and *mille sestertiûm nummûm*.

Sestertium in the neutral gender signifies *mille sestertium nummorûm*.

The marks of the *sestertius nummus* are IIS. LLS. HS. H-S. which characters denote $2\frac{1}{2}$ *asses*.

In speaking of sums above a thousand, there is often a twofold *eclipsis*, sometimes of the word *sestertium*, or its mark, sometimes of the word *mille*; as in *Martial*, vi. 10. *Pauca Jovem nuper cum millia* (serstitia) *forte rogarem*; and vii. 9. *Septingenta* (millia) *Tito debet Lupus*. There is another double *eclipsis* to be observed when they use the numeral Adverbs; as *HS. bis et tricies in annos singulos Verri decernebatur, quod aratoribus solveret*, Cic. Verr. iii. 70. where *centena millia* is understood, *scil.* 3,200,000 *nummi sestertii*, or 3,200 *sestertia*. If the sum is to be reduced to *nummi sestertii*, then *centum* and *mille* both are understood, and that *decies* or 10 must be multiplied by 100,000. If you would reduce the sum to *sestertia*, the word *centum* being then understood, it must be multiplied only by 100. Thus *decies HS.* is 1,000,000 *nummi sestertii*, or 1000 *sestertia*.

Mille sestertii is only 1000 *nummi sestertii*, in *English* money 8*l.* 1*s.* $5\frac{1}{2}$*d.*, which makes a *sestertium*.

Mille sestertia is 1000 times that sum, *viz.* 8072*l.* 18*s.* 4*d.*

Millies HS. is 100,000 times that sum, or 807,291*l.* 13*s.* 4*d.*

When the numbers have a line over them, *centena millia* is understood, as in the case of the numeral Adverbs; thus HS. $\overline{\text{MC}}$ signifies the same with *millies centies HS.* that is 110,000,000 *nummi*, or 888,020*l.* 16*s.* 8*d.* whereas HS. MC. without the cross lines denote only 1100 *nummi*, or 8*l.* 17*s.* $7\frac{1}{2}$*d*

When the numbers are distinguished by points in two or three different orders, the first towards the right hand signifies units, the second thousands, and the third hundred thousands; for instance, III. XII. DC. HS. denotes 300,000. 12,000. and 600 HS. in all making 312,600 *nummi*, in *English* money 5047*l.* 3*s.* 9*d.*

Denarius was the chief silver coin among the *Romans*; in weight, at first, the seventh part of a *Roman* ounce, which, according to Dr. Arbuthnot, consisted of 438 grains, and was equal to our *Avoirdupois* ounce; upon which calculation an ounce of silver of that number of grains would be in value 4*s.* $6\frac{1}{2}$*d.*

The subdivisions of the *denarius* were the *quinarius*, or half, so called from its value of five *asses*; and likewise *victoriatus*, from the image of *Victory* sometimes impressed upon it; and the *sestertius*, which has been mentioned already.

The *pondo argenti* amongst the *Romans* is a sort of numeral expression of sums of money, and is different from the common *libra*, which consisted only of 84 *denarii*, or 96 drachms. The *pondo*, according to *Budæus's* valuation, amounts to the value of an *Attic Mina*, or 3*l.* 4*s.* 7*d.* according to *Agricola*, to 3*l.* 2*s.*

The *Roman* gold coin was the *aureus*, which weighed generally double the *denarius*: which, according to the first proportion of coinage mentioned by *Pliny*, Lib. xxxiii. cap. 3. was worth	1	4	$3\frac{3}{4}$
According to the proportion that obtains now amongst us	1	0	9
According to the decuple proportion mentioned by *Livy*, and *Jul. Pollux*	0	12	11

SOME ALTERATIONS OF THE VALUE OF THE ROMAN COIN MENTIONED BY PLINY:

In the reign of *Servius*
A. Urb. 490 — the as weighed of brass — 1 pound.
A. Urb. 537 — 2 ounces.
A. Urb. 586 — 1 ounce.
A. Urb. 485 — $\frac{1}{2}$ an ounce.
A. Urb. 537 — *denarius* exchanged for — 10 *asses*.
A. Urb. 547, scruple of gold worth 20 *sestertii*. — 16 *asses*.
Coined afterwards of the pound of gold 20 *denarii* — *aurei*.
In *Nero's* time of the pound of gold 45 *denarii* — *aurei*.

Note 1. *Quadrantal* is the same with the *amphora; cadus, congiarius*, and *dolium*, denote no certain measure.
Note 2. The *Romans* divided the *sextarius*, as the *libra*, into twelve equal parts, called *cyathi*, and therefore they denominated their *calices, sextantes, quadrantes, trientes*, according to the number of *cyathi* which they contained.

Note, Those who do not understand decimal fractions, may observe that the denominator of every such decimal is an unit with as many cyphers as there are places of numbers in the fraction; that the decimal parts are separated from the integer by a *comma*, and that the first figure, or two first figures in the decimal parts, are chiefly to be regarded, without considering the number of places; 5 is half, 25 a quarter; as in *pes* 11,604, which is 11 inches, and 604 decimal parts of an inch, and very little more than half an inch; had it been 500, it had been just half, or if 250, just a quarter, of an inch.
